Work Experience

AI Engineer, Modeler, and Data Scientist in the Risk Management Team

April 2024 until June 2026 (2 years and 2 months)

Ofogh Korush Stores

Iran Tehran

- 1- Design, train, and optimize predictive models, for example to predict customer churn and customer lifetime value.
- 2- Develop and deploy generative AI (GenAI) models into operational processes.
- 3- Implement intelligent AI agents using the LangChain framework to automatically respond to questions from the Risk Management team.
- 4- Perform feature engineering, as well as design and extract new features from existing data in the data warehouse.
- 5- Transform analytical findings into strategic insights and translate model outputs for managers and stakeholders.

Business Intelligence (BI) Specialist

July 2023 until March 2024 (8 months)

Whitex

Iran Tehran

- 1- Collect, analyze, and interpret large datasets from both internal and external sources.
- 2- Develop and maintain interactive dashboards and automated reports using tools such as Power BI and Tableau.
- 3- Deliver data storytelling and the ability to explain complex data concepts in simple, clear language.
- 4- Analyze product sales trends and prepare comparative reports to identify sales patterns and product performance.
- 5- Perform data modeling and develop BI solutions.

AI Specialist and Data Analyst

October 2022 until August 2023 (10 months)

Tadbir Ayande Farda

Iran Tehran

- 1- Develop a cost-forecasting bot.
- 2- Design an automated trading bot.
- 3- Analyze financial markets and detect patterns using MQL5.
- 4- Provide technical analysis to support better organizational decision-making.
- 5- Perform backtesting and strategy optimization on historical data

Data Engineer

June 2022 until September 2022 (3 months)

Shatel

Iran Tehran

- 1- Design, build, and maintain scalable ETL/ELT (Extract, Transform, Load) pipelines.
- 2- Optimize data models in the data warehouse to improve the speed of analytical queries for the Risk and Marketing teams.

Education

Master: Computer engineering

2024 - Present

Tehran University

Bachelor: Computer science

2019 - 2023

Shahid Beheshti University (SBU)

GPA : 16.68

Training Courses

Creating Expert Advisor by MQL4 & MQL5

maktabkhooneh

Course Duration: 53 Hours

2024 (No Certificate)

IELTS (Speaking, Listening, Reading , Writing)
