

Kamyar Pour Mohammad

Computer Science M.Sc. Student | AI & Computer Vision Researcher

Location: Tehran, Iran

email: kamyarpm56@gmail.com

GitHub: <https://github.com/KamyarPourMohammad>

Professional Summary

Computer Science graduate student with professional experience in data analytics and artificial intelligence. Passionate about Computer Vision, Machine Learning, and Deep Learning. Experienced in developing machine learning solutions, analyzing financial data, and conducting research in weakly supervised semantic segmentation. Strong interest in building intelligent systems that bridge academic research with real-world applications.

Education:

Tehran University

M.Sc. in Computer Science

2025 – Present

Shahid Beheshti University

B.Sc. in Computer Science

2022 – 2025

GPA: 16.2 / 20

Professional Experience

1- Data Analyst

Data Kavan – Rasht, Iran ~2 Years

Responsibilities included: Financial data analysis, SQL querying, reporting and data visualization.

2- Artificial Intelligence Intern

Tosan Data Kavan *3 Months*

Research Experience

Explainable AI for Weakly Supervised Semantic Segmentation

Research project investigating the use of Explainable AI techniques to generate segmentation masks from image classification models.

GitHub repository available.

Technical Skills

Programming Languages: Python, C++, Java, JavaScript

Artificial Intelligence: PyTorch, TensorFlow, Keras, OpenCV, Scikit-Learn

Data Science: Pandas, NumPy, Power BI

Databases: PostgreSQL, SQL Server

Web Development: HTML, CSS, JavaScript, Flask, REST API

Tools: Git, Docker, Linux

Languages

Persian: Native

English: Professional
